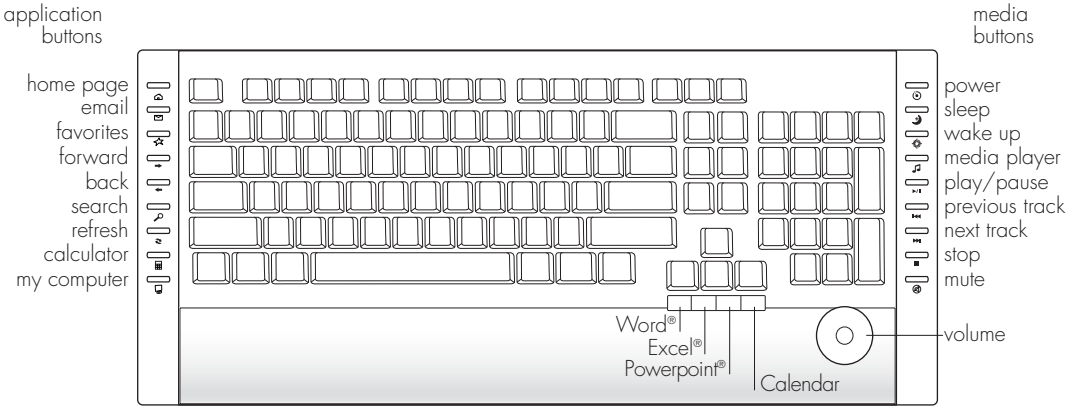
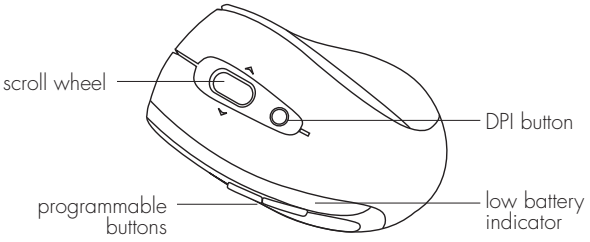
features

- plug-n-play—no synching needed
- high-resolution laser sensor
- programmable buttons—4 on keyboard and 2 on mouse
- low battery indicator (mouse)
- cursor speed button—change mouse sensitivity on the fly
- storage slot for mini USB receiver

your new keyboard



your new mouse

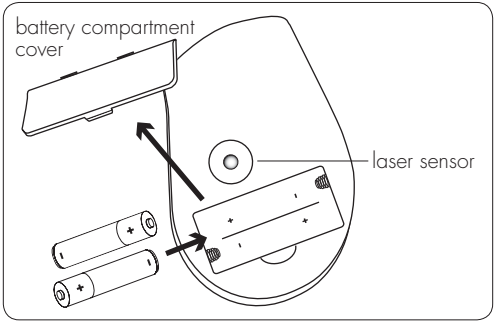


- **programmable buttons**—These two mouse buttons can be set to perform a variety of functions. (The software must be installed to change the actions of the buttons.) The default actions are **back** and **forward**.
- **scroll wheel**—Move the scroll wheel left or right to scroll horizontally. Roll the wheel to scroll up and down.
- **DPI button**—Your mouse has two sensitivity settings: standard and high-performance. High-performance mode allows the cursor to move very quickly and is useful for activities such as gaming. Press the DPI button to switch modes.
- **low battery indicator**—This indicator flashes when the battery needs to be replaced.

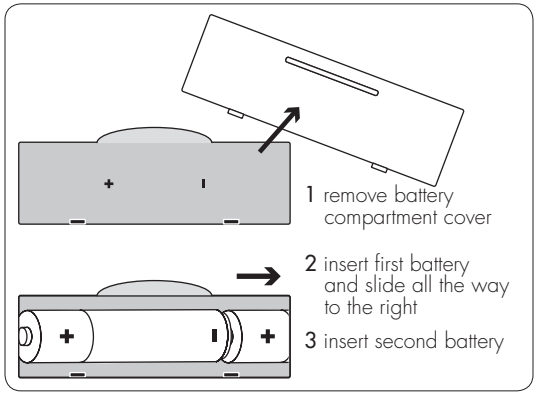
▶ **note** Some button functions require installation of the included software.

connect hardware

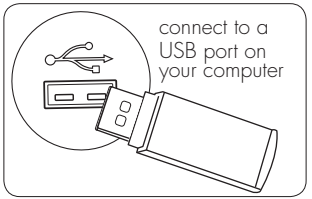
1. Remove battery compartment cover.
2. Insert 2 AAA battery into the mouse battery compartment.



3. Insert 2 AAA batteries into the keyboard battery compartment.



4. Connect the mini USB receiver to an available USB port on your computer. The keyboard and mouse automatically connect to the mini USB receiver.



5. Start using your keyboard and mouse.

To set up the advanced functions of your keyboard and mouse, install the supplied software.

► **note** To use the horizontal (side-to-side) mouse scroll function on a Windows 2000 or XP computer you must install the supplied software. Windows Vista users do not have to install the software to use the horizontal scroll function.

install software

1. Insert the installation CD into your computer.
2. On the screen that appears, click **install**.

click

3. An **InstallShield Wizard** dialog box displays. Click **Next**.
4. The **Choose Destination Location** dialog box displays. Click **Next** to accept the default installation location.
5. Once the installation is complete, restart the computer when prompted.

   When the computer restarts, the mouse and keyboard icons display in the system tray.

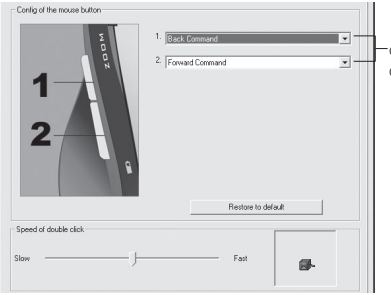
▶ **note** With the software installed, you can customize the programmable buttons on the keyboard and the side of your mouse, or change settings for the scroll wheel.

to customize the mouse buttons

1. Double-click the **mouse icon** in the system tray.

   This opens a dialog box.

2. Select the **Config of mouse button** tab.
3. Click the drop-down list to select an action for each button. Drag the slider to set the double-click speed (how fast you have to click to produce a double-click).



click to select an action

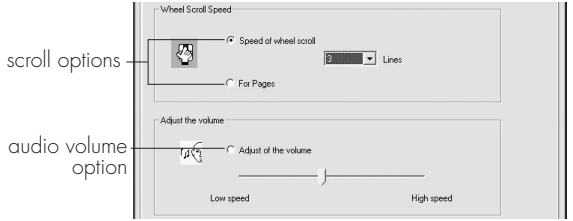
4. Click **OK** to accept the changes and exit.

to customize the mouse scroll wheel

You can set the scroll wheel to either scroll lines and pages or adjust the audio volume.

1. Double-click the **mouse icon** in the system tray.

2. Select the **Config of the mouse wheel** tab.
3. Select **Speed of wheel scroll** and choose how many lines should scroll when the wheel is rotated one click, or select **For Pages** to scroll a whole page with each click.

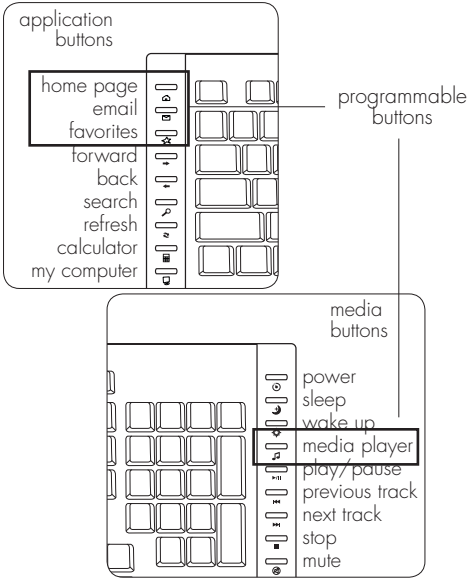


To set the mouse wheel to adjust the audio volume instead, select **Adjust of the volume** and adjust the slider to determine how fast the volume changes when you rotate the wheel.

4. Click **OK** to accept the changes and exit.

to customize the keyboard

Your keyboard has four programmable application buttons.



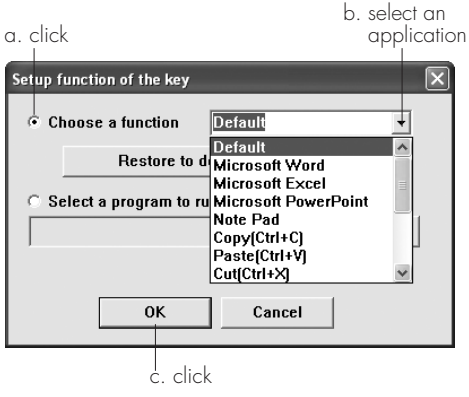
▶ **note** You can change the functions of the four programmable buttons on the keyboard to launch a variety of programs. The remaining multimedia and

internet buttons on your keyboard are pre-programmed with default settings and cannot be changed.

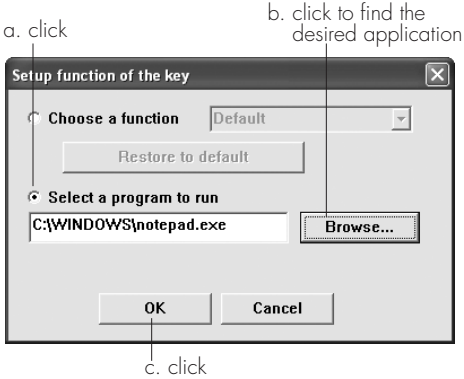
1. Double-click the **keyboard icon** in the system tray.

2. To change the action for a programmable button, click the corresponding icon.

3. Select **Choose a function**, then select an application from the drop-down list.



4. To have the button run an application not included in the list, select the **Select a program** option, then click **Browse** to navigate to the desired application.



5. Click **OK** to accept the changes and exit.

product operating tips

- Your keyboard and mouse will operate from as far away as 30 ft. (10 m) from your computer.
- Customize the programmable keys on your keyboard and mouse for greater functionality.
- Your mouse has two sensitivity settings: standard mode and high-performance mode. High-performance mode allows the cursor to move very quickly and is useful for activities such as gaming. Press the **DPI** button (behind the scroll wheel) to switch from standard mode to high-performance mode and back.
- The scroll wheel is also a button. Press the scroll wheel (without rolling it) to automatically scroll a document or web page, then move your mouse up/down (vertical scrolling) or left/right (horizontal scrolling) to set the automatic scroll speed.

troubleshooting

situation	try this
keyboard or mouse does not work at setup	• Ensure the mini USB receiver is connected. • Check that batteries are inserted correctly into the battery compartment for keyboard or mouse. • Move the mouse or keyboard closer to the mini USB receiver. • Disconnect the mini USB receiver, then reconnect it. Try a different USB port on your computer, not a USB hub.
keyboard or mouse has stopped working	• Check that the batteries are good. If necessary, replace the batteries. • Ensure the laser sensor on the mouse is clean.
mouse low battery indicator continues to flash	• Install a fresh battery.

FCC Statement

This device complies with part 15 of FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction guide, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult a service representative for help.

Properly shielded and grounded cables and connectors must be used in order to comply with FCC emission limits. LifeWorks is not responsible for any radio or television interference caused by using other than recommended cables and connectors or by unauthorized changes or modifications to this equipment. Unauthorized changes or modifications could void the user's authority to operate the equipment.

Tested To Comply With FCC Standards
FOR HOME OR OFFICE USE

⚠ Warning

Improper setup, use and care of this product can increase the risk of serious injury, death or device damage. Read and keep this guide and all other printed guides for future reference. For updated guides or replacements, go to www.life-works.com

⚠ Do Not Attempt Repairs

Do not attempt to take apart, open, repair, service or modify the device(s). Doing so may risk electric shock or other hazard. Evidence of any attempt to open or modify the device, including any peeling, puncture or removal of labels, will void the Limited Lifetime Warranty.

Class 1 Laser Products

iHome Class 1 Laser products comply with International Standards EN 60825-1: 1994+A1+A2: 2001 and FDA standards title 21 CFR Subchapter J. Observe the following precautions; using the product in a manner other than specified here may cause hazardous radiation exposure.

- Do not stare at the Laser or shine the Laser into your eyes or those of another person.
- Do not allow young children to use the product without adult supervision.
- Do not try to replace or repair the Laser; these components are not user-replaceable.
- Do not shine the Laser on a reflective surface.
- Do not scratch the lens.

Keyboard and Mouse Devices: Health Warning

Use of a keyboard or mouse may be linked to serious injuries or disorders. As in many activities, when using a computer you may experience occasional discomfort in various parts of your body. However, do not ignore symptoms such as persistent or recurring discomfort, pain, throbbing, aching, tingling, numbness, burning sensation or stiffness. Promptly see a qualified doctor, even if symptoms occur when you are not working at your computer.

There is general consensus among researchers that there may be many factors linked to the occurrence of these symptoms, including overall health, stress, physical condition and how a person positions and uses his or her body during work and other activities (including the use of a keyboard or mouse). The amount of time a person spends performing an activity may also be a factor.

If you have questions about how your own lifestyle, activities or physical condition may be related to these symptoms, see a qualified health professional.

Battery-Powered Devices

Use of rechargeable or disposable batteries in an improper manner may result in battery fluid leakage, overheating or explosion. Battery fluid is corrosive, may be toxic, can cause skin and eye burns, and is harmful if swallowed.

Wireless Devices

Remove the batteries from any wireless device, or turn it off, before boarding an aircraft or packing the device in luggage that will be checked. Wireless devices can transmit radio frequency (RF) energy whenever batteries are installed and the device is turned on.

Radio Frequency Technical Specifications: 2.4 GHz Devices

Non-specific short range device. RF output power meets all SRD requirements.
